Software Developer/Architect

Job Title

SAM Software Solutions is an SME based in Nottingham East Midlands, we are looking for a Lead .NET Developer with some Software Architecture skills to join our growing team.

Your role as a Lead Developer will involve architecting, implementing and testing application and system software, this includes modularising and improving the features of our existing Service Management software so that it's scalable and cloud ready.

The successful candidate will assist in the overall leadership & performance of our small development team, you should be self-motivated, a self-starter, focussed, and a team player.

You should be a confident C# and .NET developer, and have some exposure or experience in architecting software solutions.

You must be customer focussed and should have exceptional time management skills with ability to prioritise and organise your own workload.

Roles & Responsibilities

- Primarily, your role will be to develop, implement and test mission critical software applications for our existing and new products, written in C# .NET
- Technically lead the team to re architect legacy applications and deliver new features of our Service Management Software Solution
- Responsible for delivery, reporting and presentation of technical work to our customers and partners
- Get involved in simulation testing, and bug fixing

Qualifications

You will be a confident Software Engineer, looking for a career, with skills in the following: C#.NET / SQL Server / Azure.

Job Benefits

You'll be rewarded with an excellent benefits package including fantastic pension, attractive holiday allowance, flexible working and a clear career development plan.

You will be in a prime position to shape this role to achieve your personal career objectives, and drive the success of the company.
