SAM Stock Control

Overview

SAM stock is aimed at businesses that require affordable stock and inventory control, the SAM Stock system offers all the functionality you need to meet the needs of your consumers.

With **SAM** Stock you can hold inventory in a variety of forms

- Raw materials
- Work-in-progress
- Finished goods
- Consumables
- Plant and machinery Spares

Having too high or too low a stock level can be harmful for your business

With **SAM** stock you can manage minimum and maximum stock levels and avoid waste, or the expense of holding too much stock.

High stocks represent money lying idle when it could be put to better use, whereas low stocks could result in not being able to take on and meet orders.

Know exactly what you have in stock

Stock levels are updated instantly as sales & purchase orders are processed. No more staying late at the office to update your stock or spreadsheets.

Hold the right inventory for better cash flow

SAM Stock reports tell you exactly how much stock you hold, how much is already sold & what is on order with your suppliers — updated in real time.

Stress-free stock takes

Use a stock list and a bar code scanner to scan and update your stock levels instantly when you need to count stock.
